Week 28

This Week

This week was Health Week and we have been learning all about keeping healthy. We tasted different fruit, made healthy eating posters and created an 'eatwell plate'. We took part in aerobics and afterwards enjoyed a healthy breakfast together. The children have made a booklet about their activities which will be kept inside their Learning Journals. The children had fun on a giant bouncy castle obstacle course called The Terminator. They all beat Mrs Hannaway to the finish! We ended Health Week with Sports Day; the children spent the morning experiencing lots of different activities on the school field.

Next Week

We will continue our topic, Splish, Splash, Splosh and shall be learning all about rivers. We shall be making paper boats and enjoying lots of water play. We shall be completing a science experiment on floating and sinking by testing lots of different objects.

A reminder ! Playground

As the weather improves, we are spending lots of time learning outdoors. We need to set up our activities before school in the morning. Please can you line up with your children outside the Reception playground gate as many of the older brothers and sisters are playing with our toys before school and they are getting broken or going missing. The class teachers will come outside to open the gate before 8.50am. Thank you.

Healthy Breakfast

The Terminator!
